OBJECTIVE

I am an Efficient Software Developer with over 3 years of work experience and proven knowledge of team building, branding, and business development. I am aiming to leverage my abilities to fill the Frontend Development Internship role at your company.

PROFESSIONAL EXPERIENCE

Ingressive for Good X ZURI Training – Remotely.

Fullstack Developer Intern, Feb 2022 – Aug 2022

- Participated in the live project phase, where we built a web app that helps users compare CSV and excel files by searching and highlighting duplicates, removing duplicates, searching and replacing, etc.
- Contributed to the development of the frontend of the Live Project by building the features and about section page.
- Also contributed to the backend development of the project using python to implement the search and replace feature.
- Tools used: HMTL5, CSS, React.js, FastApi, Terminal, Git, Github. PostgreSQL.

Hamoye Internship Program – Remotely

Data Analysis Intern, Jan 2021 – June 2021

- Machine Learning: Regression - Predicting Energy Efficiency of Buildings.
- Neural Network, Image Recognition & Object Detection.
- Machine Learning: Classification - Managing the Quality Metric of Global Ecological Footprint
- Tools used: Jupyter Notebook, python.

PERSONAL PROJECTS

Crown-Clothing

- This is a clothing web app where users can sign in and check through the categories of cloth present, cart, and checkout and pay via online transaction..
- Live link — <https://crown-clothing-free-realm.netlify.app/>
- Github link repo — <https://github.com/Temitayo40/crown-clothing>
- Tools used: HMTL5, CSS, React.js.

Natours_Project

- Natours Project is a responsive webpage built with cool animation features using HTML & SASS.
- Live Link: <https://natours-project-free-realm.netlify.app/>
- GitHub Link: https://github.com/Temitayo40/Natours_Project
- Tools used: HMTL5, SCSS.

Cocktail

- Using the Udemy tutorial I was able to build a webpage named cocktail, where users can visit and search for cocktails of their choice, sorting out their input according to the cocktails available and giving back a message if the information is not present.
- Live link — <https://react-projects-15-cocktails.netlify.app/>
- Github link repo — <https://github.com/Temitayo40/Cocktails>
- Tools used: Html5, CSS3, JavaScript, React.Js.

OminiFood Webpage

- This is a technology company first, but with a major focus on consumer well-being through a healthy diet. A healthy meal is delivered to you every single day.
- live link — <https://ominifood-free-realm.netlify.app/>
- GitHub repo link — <https://github.com/Temitayo40/OminiFood>
- Tools used: Javascript Html 5, CSS.
